

Diamond Grinding Polishing Pads

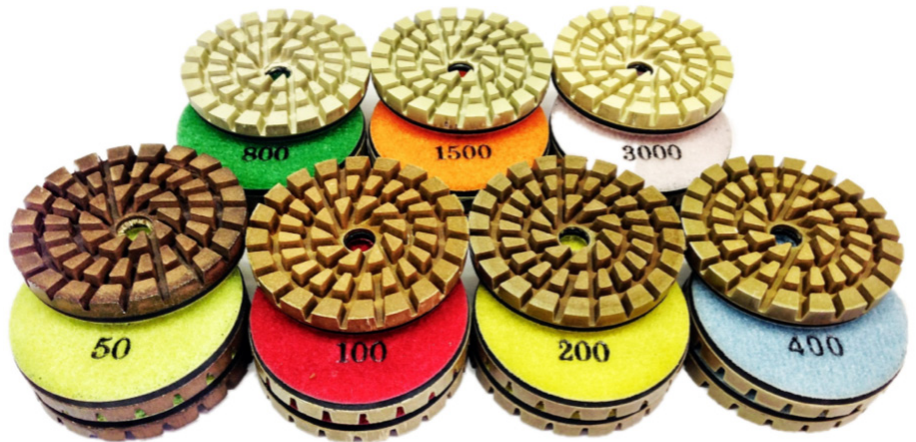

3" & 5" Pads for Concrete

Fast Acting, High Diamond Content

Concrete specific pads that can be used in wet and/or dry applications and allow you to finish your job faster, and with a better finish than the lower diamond content non-concrete specific pads.

5 inch Diameter (3mm thick)
Diamond Grinding/Polishing Pads

3 and 5 inch Diameter (8mm thick) Diamond Grinding/Polishing Pads

Features

- High diamond content
- 8mm thickness
- Concrete specific resin
- Wet/Dry resin

Benefits

- Faster and higher quality grinding and polishing
- Pads do not need frequent replacing
- Pads specifically made for the texture and hardness of concrete provide a higher quality finish than pads made for harder or softer surfaces
- Additives in the resin allow for high quality performance in Wet and Dry applications without a need to change pads
