

# SLAB ROCKER TABLE SYSTEM

A-Frame with Brake

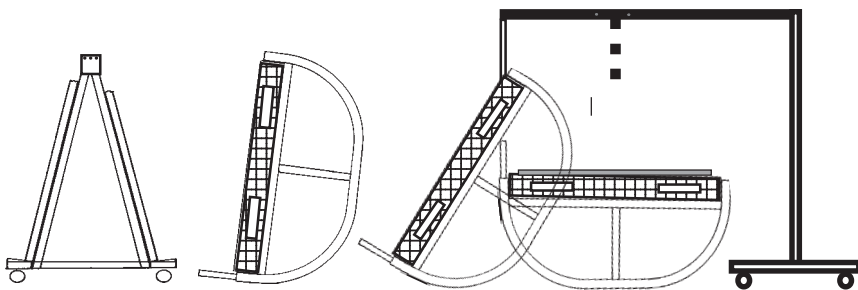

Rocker Table Back

The **Slab Rocker Table** designed to allow one person to handle a stone slab from A-Frame to work surface. The table can be rolled to a semi vertical position to accept the slab and is then easily lowered to horizontal for layout and cutting.

The **Jib Boom** with power hoist rotates to any position around the table for lifting and positioning of the TRAC Star 2000. The **A-FRAME** has a 3000 lb capacity and braking system.

## TRANSPORT ♦ ROCK ♦ ROLL ♦ CUT

- ♦ Place the table in the upright position and lock in place.
- ♦ Transport the A-Frame with slab up to the table.
- ♦ Tilt the slab top to the table.
- ♦ Lower table and you are ready to work!!

\* Suggested Retail, including Rocker Table, Jib boom, Power Hoist and A-Frame

\*\* Rocker System including TRAC Star Sawing System
