

TracStar Self Propelled Rail Saw

The industry's only self propelled rail saw

When you need something that costs a fraction of a bridge saw i.e. to start a business or increase capacity, but produces a more consistent, repeatable cut than a hand driven stone saw.

I wanted to start my own granite fabrication business, without investing in an expensive bridge saw; and the TracStar made it possible. The sturdy rails make long, precise cuts, and the accessories give me all the flexibility I need to take on virtually any job."

Guido Massimi, Valley Stone World

"It is not very often I run into someone so helpful with customer service. The TracStar got here when you said it would, and we had it up and running the day we received the vise. You folks make a great saw!"

Ron Lambert, Feather River Tile

Features

- Drive Motor: Forward/Stop/Reverse, Speed 0 to 6 ft. per minute
- Power: Cuts through one foot of ¾" Texas Pink granite in 8 seconds
- 4'6", 7'6" and 12' Rails
- One year warranty
- Durability – Coming Soon

Benefits

- Self propelled saw gives you more consistent, easier to execute cuts than a hand driven machine
- Increased Productivity
- Gives you application flexibility
- Gives you peace of mind
- Increased Durability

Part Number	TracStar
Motor	3450 rpm, 1.5 HP, 4.5 ft lbs torque
Power	110V, 60 Hz
Current	18.8 Amps
Driver Speed	Adjustable up to 6 ft. per minute
Uncrated Weight	
(Saw)	110 lbs
(Rail Set)	75 lbs
Crated Weight	
(Saw)	160 lbs
(Rail Set)	90 lbs
Blades	Uses 7", 8", 10" blade
Rails	4'6", 7'6", 12' lengths

Blade:	Stone Thickness, up to:
7"	1 ¾"
8"	2 ¼"
10"	3 ¼"
